

ZT400 Technical Training

NFC Tag Demonstration

- 1.) Tap Your Android device to the **NFC tag** located on the side of the front panel.

The NFC tag will automatically pair the Printer and Android device via Bluetooth and then launch the Zebra Setup Utility App if it is already installed on your phone. (Note: if you do not have the ZSU app installed on your smart device, it will send you to the ZT400 QR Code video site on Zebra.com)

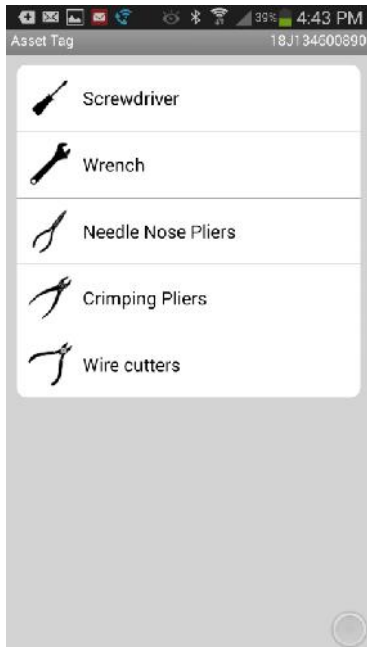

2.) Select the **Zebra Utilities** App and then select either “Always” or “**Just once**” to launch the utility.

3.) From the Utility's Home page, select “**Asset Tag**” button.

4.) Select one of the product labels to print.

5.) An image of the tool you selected will pop up, now press the **“Print”** button in the upper right area of your screen.

6.) One product label will print.

End of the Demo
