

Cleaning the PX30i Performance Class driver files from Window Systems

1. Use “Add or Remove Programs” in the Control Panel to uninstall the “Zebra Performance Class Printers” windows driver or goto “Start Menu->Programs-> Zebra Performance Class Printers” and click “Uninstall”.

(Add or Remove Programs)

(Start Menu->Programs->Zebra Performance Class Printers)

2. If the “Add or Remove Programs” method is used the uninstall process will ask “Do you want to completely remove the selected applications?” click “Yes” for the uninstall process to start.

3. Setup will display the following screens if selected to uninstall from the “Start Menu->Programs-> Zebra Performance Class Printers” and clicking “Uninstall”

4. Select “Remove” and click “Next”, the uninstaller will prompt the following message, click “Yes” to start the uninstallation or “No” to cancel.

5. Upon completion of the uninstallation process, click “Finish” to complete the uninstallation and the system will restart. Please select to reboot the system to ensure that the uninstallation has cleaned all the driver files.

6. After the system has rebooted, check if the uninstaller has removed the “%WINDIR%\PLPrinters” directory created during the installation.
7. Also ensure that the following files are removed from the system from the respective locations:

Location: “%WINDIR%\system32\spool\drivers\w32x86\3”

- PLP.BMP
- plp.inf
- zbralogo.bmp
