

Defaulting parameter groups on the QLn printer using the Zebra Setup Utility

The Zebra Setup Utility can be utilized to default parameter groups on the QLn printer

1. After selecting your printer, click on the “Open Printer tools” button.
2. Click on the Action tab and choose the parameter grouping that you wish to default.
In the illustration below, the wlan parameters have been chosen by selecting “Restore wlan”.
3. Click on the “Send” button.
